- Hardware repair (PCs and phones)
- 4+ years of customer service
- Organized with schedules, quotes and stock

LANGUAGES

Spanish · native

English · intermediate
B1 (in progress, completing December 2026)

PROFILE

I'm in the final semester of the Technical Degree in Programming at UTN. I mainly program in Python and Java, and lately I've added web development and AI to the way I work. I'm not tied to web development: I'm interested in different branches of IT, and I'm looking for my first IT job (full-time, part-time or internship) so I can keep learning. In parallel, I'm building a startup with a partner and I run my own phone repair service.

PROJECTS

Early-stage startup · Co-founder — 2026 – present

My own project with a partner. I take part in product definition, planning and development.

AI agent team for development — 2026 – present

I built a team of agents and subagents with Claude Code to develop software projects. It works with Spec-Driven Development: the specification first, then the implementation task by task, with my review at every step.

Personal portfolio — 2026

Bilingual (Spanish / English) website deployed on Vercel.

EXPERIENCE

Vegatech · Phone repair service (own business) — Jan 2026 – present

Godoy Cruz, Mendoza

- Diagnosis and repair of Android and iPhone devices (hardware and software).
- I run the whole business: quotes, spare parts, repair tracking and customers.
- Supplies and cost control with digital tools.

Customer service and sales · Retail food store — 2021 – 2025

Serving customers in a very busy store, handling the cash register and restocking merchandise.

Administrative internship · Rotorc S.A. — 2023

Administrative support to the team and document organization.

EDUCATION

Technical Degree in Programming — Final semester

Tecnicatura Universitaria en Programación · UTN · Facultad Regional Mendoza

Artificial Intelligence Development Course — Completed

High School Diploma in Economics — Graduated

Bachiller en Economía · Colegio Valentín Bonetti
